In view of this, our customer service team is available from Monday-Saturday from 9:30-6:30 to serve customers quickly, communicate and give solutions ensuring customer satisfaction by resolving customer complaints in a timely and efficient manner.

We are working to give you best experience & appreciate your relationship and business with us.

On that note, I present our Price List for 2023 for our Lab Chemicals business to meet your laboratory work requirements. The Prices are revised as per market dynamics while remaining competitive.

INORGANiC VENTURES has introduced 4 new products this year. The new products are Certified Reference Materials (CRMs) for Elemental Impurities (3x gold with the new USP specifications, the CRM with the old specs being still available), Class 2B Oral Elemental Impurities (3x gold with the new USP specifications, the CRM with the old specs being still available), Platinum Cobalt 500 Hazen Color Standard, and 100 ppm 7 Element ICP Calibration/Quality Control Standard.

We offer our customers with over 1000 high-end products from our Aquaculture, Pharmaceutical Excipients, Food Additives and Laboratory Chemicals verticals. Since last year, we have also partnered with STREM to bring their specialised research chemicals in India. Short description for every business can also be found out in the product section and will be happy if you also look out for these products for any suitable application in your organisation.

Globally Harmonised System GHS Pictograms and Hazards

The GHS is an acronym for The Globally Harmonized System of Classification and Labeling of Chemicals. The GHS is a system for standardizing and harmonizing the classification and labeling of chemicals. It is a logical and comprehensive approach to:

- Defining health, physical and environmental hazards of chemicals
- Creating classification processes that use available data on chemicals for comparison with the defined hazard criteria
- Communicating hazard information, as well as protective measures, on labels and Material Safety Data Sheets (MSDS)

The hazard communication is made through GHS Pictograms depicted below that indicate the potential hazard of the product.

 <p>Health Hazard</p> <ul style="list-style-type: none">• Carcinogen• Mutagenicity• Reproductive Toxicity• Respiratory Sensitizer• Target Organ Toxicity• Aspiration Toxicity	 <p>Flame</p> <ul style="list-style-type: none">• Flammables• Pyrophorics• Self-Heating• Emits Flammable Gas• Self-Reactives• Organic Peroxides	 <p>Exclamation Mark</p> <ul style="list-style-type: none">• Irritant (skin and eye)• Skin Sensitizer• Acute Toxicity (harmful)• Narcotic Effects• Respiratory Tract Irritant• Hazardous to Ozone Layer (Non Mandatory)

Label Information

The newly designed labels are visually appealing, offer comprehensive product details, and a special emphasis is on handling, storage and safety information along with the hazard pictograms adhering to GHS Compliance.

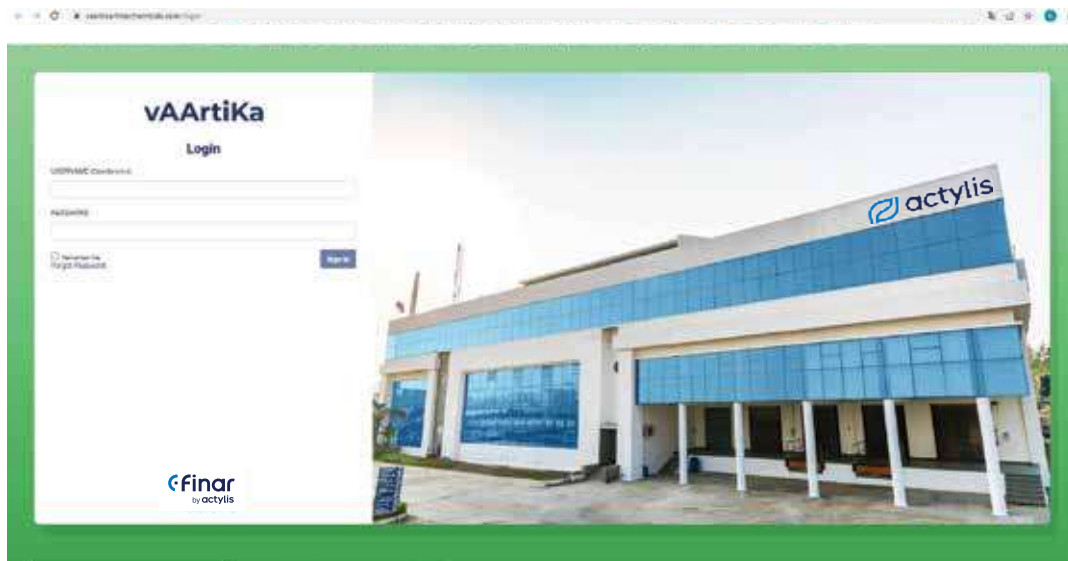

All Product Labels come affixed with a unique QR code. Users can easily scan the QR code through their handheld device such as a smart-phone or a tablet and instantly obtain the Product COA of that particular batch. All you need is a QR code scanner/reader installed in your device which may be downloaded from the Google Play Store for Android devices or Apple Store for IOS devices.

Users are advised to observe the storage, handling & safety instructions mentioned on each label or MSDS and consider them good for use and guaranteed to perform upto the prescribed shelf life of the product.
